HOW TO REGISTER with

ELITE LIVESTOCK AUCTIONS

Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device.

Click on the **"Sign Up"** page / link

Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer)

Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue

Click **"Register"**

You will then be notified by email that an account has been created.

Once an account has been created you are all **"Set to Bid"**

Each Auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website.

Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**

The sale will then approve your application to bid and on the sale catalogue you will see **"✓ Bid Request Approved"**

On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding.
(There is no need for software download)

At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

BULLS

17 Bulls sold between \$4,000 - \$5,000
 6 Bulls sold between \$5,000 - \$6,000
 7 Bulls sold between \$7,000 - \$8,000
 18 Bulls sold \$9,000 and above

FEMALES

5 Females offered, 4 sold
 Female Top Price \$ 8,000
 Average \$ 5,125
 Gross \$20,500

SPECIAL NOTICE TO BUYERS & AGENTS

NO VERBAL INSTRUCTIONS CAN BE ACCEPTED

1. All animals have been C.Ab certified free and have been inspected for breed type by Show and Sale Inspectors and Veterinary inspected. All testicle measurements are taken by accredited vets belonging to the association of Australian Cattle Veterinarians (AACV). General vet inspection done by Dr Ross Pedrana and Dr Henni Strydom.
2. In the interest of buyers and to prevent the occurrence of mistakes, all instructions concerning the collection, delivery and trucking or shipping of cattle and insurance thereon must be given IN WRITING at the Company's Instruction office. Such instructions are to be signed by the buyer or his representative.
3. Cattle will, as far as possible, be dispatched in the order in which instructions are received.
4. Agents may deliver any lots to other Agents if requested, but in such case the buyer is required to sign a delivery order.
5. When cattle are to be collected from other Agents, delivery orders are to be handed to the forwarding Agent by the buyer.
6. Instructions for dispatch of consignments comprising more than one owner must be signed by each buyer; no instructions will be considered complete until all have signed.
7. Insurance: Cover can be effected immediately instructions are given.
8. Buying Number System - a buyers number system will be in operation at this sale. All prospective purchasers must register at the Agent's Office and obtain a buyers number prior to commencement of sale.
9. GST - GST will be added on the fall of hammer to purchase price. You will be invoiced for purchase price plus GST.
10. NLIS - All cattle will have their NLIS buttons and will be transferred to successful purchasers number by selling agent at completion of sale.
11. Disclaimer - the Committee and/or their agents do not give any warranty as to errors and omissions if any in these particulars which they believe to be accurate when compiled. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.
12. Public Liability - Any person attending the sale does so at his/her own risk. All persons attending the sale release the Committee and vendors from all actions or demands due to any loss, death, damage or injury occurring on the premises. The Committee and vendors are not responsible and have no liability for any death, or injury to person or any loss of, or damage to any person attending the Show & Sale, their property or otherwise.
13. Indemnity - All persons attending the sale agree to indemnify the Committee and vendors from and against any liability, loss, damage, expense or claim which the Committee or vendor may incur, including to a third party, during or after the Show & Sale in all respects.
14. **VENDORS GUARANTEE ON FEMALES**
 1. It is a condition of all sales that Vendors warrant that all females catalogued and sold as unjoined are fertile to natural service within 12 months of sale;
 2. The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 12 months of the sale date:-
 - a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. There is no evidence that the female suffered any injury or illness subsequent to being sold to the Purchaser which could have affected her breeding ability; and
 - ii. There is no evidence that the female has been subjected to embryo transfer procedures.
 - b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.
15. **VENDORS GUARANTEE ON BULLS**
 1. It is a condition of sale that Vendors warrant that all bulls are to be sold as fertile and capable of natural service within 6 months of the date of the sale;
 2. The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 6 months of the sale date:-
 - a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. The bull is infertile or incapable of natural service;
 - ii. There is no evidence that the bull has suffered any injury or illness subsequent to being sold to the Purchaser which could affect his breeding ability
 - b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.

OUTSIDE AGENTS REBATE

A 2% rebate is offered by the vendors to all outside agents who register in writing 24 hours prior to the sale, purchase and pay within the terms of settling agent.

FREIGHT REBATE

\$1.00 per km, to a maximum of \$500 for each purchaser who buys 4 or more live animals at auction. vendors responsible to transport bulls and females to Dubbo if advantageous to purchaser.

PREPARE YOUR BULLS BEFORE JOINING

Vaccinating bulls is the key to prevention of vibriosis.

Vibriosis is a major venereal disease and can cause infertility and abortion in cattle.

Conception rates can drop as low as **40%**¹

Vaccinating bulls is effective and practical

- It can lead to increased pregnancy rates
- It has no adverse impact on testicular function and semen morphology²

AVAILABLE AT YOUR LOCAL RURAL SUPPLIER

1. Hum S. NSW Department of Primary Industries (DPI) February 2007. *Primefact*, 451.
2. Zoetis Study Number B930R-AU-14-285. Data on file.

UNDERSTANDING EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE.

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average.

Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average.

Higher values are usually more favourable, however this is requires a balance between adequate doing ability

in daughters and carcase fat thresholds for target markets.

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores.

Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual

USDA Yield Grade values.

Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

STAR BREEDER PROGRAM

BUY WITH CONFIDENCE

The **STAR BREEDER** program aims to maximise the reproductive integrity and health of stud and commercial stock.

A STAR BREEDER certified animal has been:

- ✓ Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- ✓ **Vaccinated against Pestivirus (BVDV)** to ensure they are protected from the effects of this infection
- ✓ **Vaccinated against Leptospirosis**, a reproductive disease and potential WH&S risk for cattle handlers
- ✓ **Vaccinated against Vibriosis**, a sexually transmitted cattle disease

You can be confident that every step has been taken to ensure these animals will not introduce preventable reproductive diseases into your herd. For more information talk to your Zoetis Cattle Representative, call **1800 963 847** or visit starprogram.com.au

Zoetis is proud to support the Australian Shorthorn Breeders' Society. We encourage all members to look for and support the Star Breeder Program.

zoetis

Zoetis Australia Pty Ltd. ABN 94 156 476 425. Level 6, 5 Rider Boulevard, Rhodes NSW 2138. © 2018 Zoetis Inc. All rights reserved ZL0851 02/18

Protection is best before Conception

Once your bulls and females are fully vaccinated, log onto www.starprogram.com.au and complete your details and the statutory declarations that your animals have been treated as per the STAR Breeder program.

You will then receive a STAR Breeder Program certificate for your stock, valid for 12 months from date of vaccination.

This is your buyer's quality assurance that you have taken all available steps to protect your animals against introducing reproductive disease into their herd.

STAR BREEDER PROGRAM

	Vaccination	6-8 weeks pre-joining pre-sale	2-4 weeks pre-joining pre-sale	Annual Booster
Test and Confirm bull/female is not a PI	Ultravac 7in1®	✓	✓	✓
	Vibrovax®	✓	✓	✓
	Pestigard®	✓	✓	✓

It takes Two

Vaccination program requires 2 shots to establish immunity

1st shot is the priming dose for the body's defence against a bacteria or virus; 2nd shot ensures immunity is established.

To fit in with farm management practices, the time between the 1st & 2nd dose of Pestigard® can be up to 6months.

Immunity is expected to develop within 14 days of the second injection. Pestigard® and Ultravac 7in1® can be used for up to 30 days after opening provided correct storage instructions as per the product leaflet are followed.

This program may commence up to 6 months prior to the Show & Sale

Now your bulls & females are Zoetis STARS and are ready for SALE

The only true one-shot MH vaccine

Rapid onset: immunity within 7 days
so the benefit is seen on farm

Protects for at least 17 weeks

Protection at time of challenge
on farm or at feedlot entry

Saves handling cattle twice and
the added cost of a second dose

Bovi-Shield
