SALE INFORMATION

Supplementary Sheet

All sale bulls will have weights, fat depth, EMA & IMF scans, scrotal size measurements and will have been semen tested. A supplementary sheet with this information will be available from Monday 20th July 2022. The bulls all have EPD's printed in the catalogue that have been generated from phenotypic and genomic data.

Fertility & Breeding Guarantee

All sale bulls have been semen tested by either Geoff Steinbeck of Excel Genetics (Bungulla) or Piper St Vet Clinic (Nagol Park) and are guaranteed to be fertile on the day of the sale.

All sale bulls are guaranteed to be breeders with the exception of

- a. In the event of injury or disease that occurs to the animal after the sale
- b. Gross negligence or wilful misconduct on the part of the purchaser.

NB. We recommend insurance for your purchase/s. Every care but no responsibility will be taken by the vendors between the fall of the hammer and the loading of bulls.

Health Status

All sale bulls have been vaccinated for 7in1, Pestivirus & Vibriosis

Transport

There are various options regarding transport, please talk to vendors if you require assistance with transport.

Inspection

Bull will be available from 9am on Sale Day at "Bungulla" Manilla. Prior inspection is also available via appointment. Contact Peter 0428857348 for Bungulla Bulls & Roger 0427102258 for Nagol Park Bulls. Videos of all lots will also be uploaded on the AuctionsPlus website.

Buyer Registration

All prospective buyers are required to register and obtain a buyers number prior to the sale.

Buyers Instructions

1. Buyers are to complete an instruction sheet provided by the selling agent at the completion of the sale and before leaving the property.
2. No verbal instructions will be accepted
3. Instructions for dispatch of bulls consisting of more than one owner must be signed by each buyer, instructions will not be considered complete until all have signed.
4. All lots will be sold GST exclusive.

Outside Agent Rebate

An outside agent rebate of 4% will be offered to agents who attend the sale and introduce their clients in writing to Elders Tamworth 0267653900 or 0428668005 at least 24hours prior to the sale. The rebate will NOT be paid outside these conditions.

Catering

Drinks, morning tea & lunch are provided.

Accommodation

There are many accommodation options in Tamworth, Gunnedah & Manilla. There are also regular passenger flights to and from Tamworth on a daily basis.

Disclaimer

The vendors, selling agents, its members, related corporations and employees, will act with due care to provide correct information but will not be responsible for any errors or omissions in this catalogue. All persons who attend the sale do so entirely at their own risk and the vendors, Bungulla Pastoral Company and RW & NL Evans and the selling agents do not assume or accept any responsibility or liability, of whatever nature, legal or otherwise, for any accident, injury or damage which may occur.

The Capel Family would like to welcome you to our Inaugural On-Property Bull sale at Bungulla in conjunction with Nagol Park. Bungulla Shorthorns were established in 2001 with females from the Bundaleer Shorthorn stud SA, additional females were purchased at the Erambie Shorthorn stud dispersal in 2004.

Bungulla Shorthorns' breeding herd of 220 quality registered females has been continually sourcing superior indexing genetics. To enhance the commercial beef producers' ability to breed early maturing high marbling cattle with a consistent muscle pattern, whilst maintaining softness and do-ability. The line-up of bulls at this year's sale reflects the consistent qualities we look for in our cattle.

We have received great results after selling Droughtmaster PTIC heifers joined to our shorthorn bulls for \$3780 to continue their breeding lines in central Queensland. We have great faith in all of our cattle, bulls & females to perform in all regions.

Reference Sires:

BUNGULLA LYNDON (PGCL38). By the well-known impact sire, YAMBURGAN OSSIE E65 and out of a Fanciful Cow. Lyndon from a calf was a standout out with his smoothness and mobility complemented by his length of body and depth of flank. He is ranked in the top 2% of the breed and has produced some outstanding progeny that have consistent high marbling and Carcass weight EPDs. We have also retained an outstanding young sire Bungulla Lyndon Q46 which will hopefully continue to have the impact his father did on his progeny.

YAMBURGAN SPARTON (YY K442) – Purchased from Yamburgan for his incredible strength of spine and eye-catching phenotype. K442 has left a stamp on his progeny with all showing early maturing patterns, thick, soft, and mobile. He also has exceptional EPDs for weaning weight, yearling weight, fat, and marbling.

YAMBURGAN GIGABYTES (YY P16) purchased from Yamburgan in shares with Bundaleer Shorthorns, SA, is a moderate bodied bull with a strong spine, thickness, great expression of muscle pattern whilst having doability and softness. He has been joined to heifers for the past two years with zero calving issues.

BUNGULLA LUVABULL (PGCL120) is a stand out moderate bull for phenotype with an exceptional muscle pattern whilst still maintaining doability and softness. He is breeding very consistent progeny. He is a son of Moombi Ooktali (MBIG34) and is out of an exceptionally feminine female with great attributes. His dam Bungulla Derrimut (PGCA11) is by Bundaleer United Chief (GEAU21).

We look forward to seeing you on sale day, prior inspections welcome.

Kind Regards Peter, Lou, Jock, Angus & Enid Capel.

Welcome to the Inaugural Bungulla/Nagol Park Bull Sale. On behalf of all of us at Nagol Park we would like to thank the Capel Family for the opportunity to run a combined bull sale. We look forward to working with the Capel Family for many years to come.

At present the Australian Beef Industry is in a rebuilding phase recovering from the drought of 2017-2019. Reduced cattle numbers leading to below normal supply and favourable seasonal conditions sees a very positive and buoyant cattle market. Seeing record prices achieved across the board in all beef markets. It is a great time to be rewarded for investment in beef cattle and we hope you see value in the draft of bulls being offered by both studs in 2022.

Nagol Park Shorthorns was established in 1989 and has been run with a focus on the profit driver characteristics of fertility, structural soundness, growth rate, carcase quality and yield. With these traits in mind the aim is to produce cattle that are market diverse in their breeding outcomes. Selection is based on phenotype, pedigree & genetic data via genetic evaluation (IGS & Genomics) to identify the cattle to suit our clients requirements. The Nagol Park sale bulls have all been sire verified with their IGS data supported by both DNA & physical data.

We place a strong emphasis on our cow families as it is our belief that a strong cow herd influences the quality, predictability and profitability of the bulls produced for our clients.

We are very pleased with the draft of 10 bulls on offer at this sale. We believe that the growth, structure, fertility traits, calving ease & carcase merit of these bulls makes them suitable for a wide range of beef operations and markets, including the flagship brand of Shorthorns, JBS Thousand Guineas.

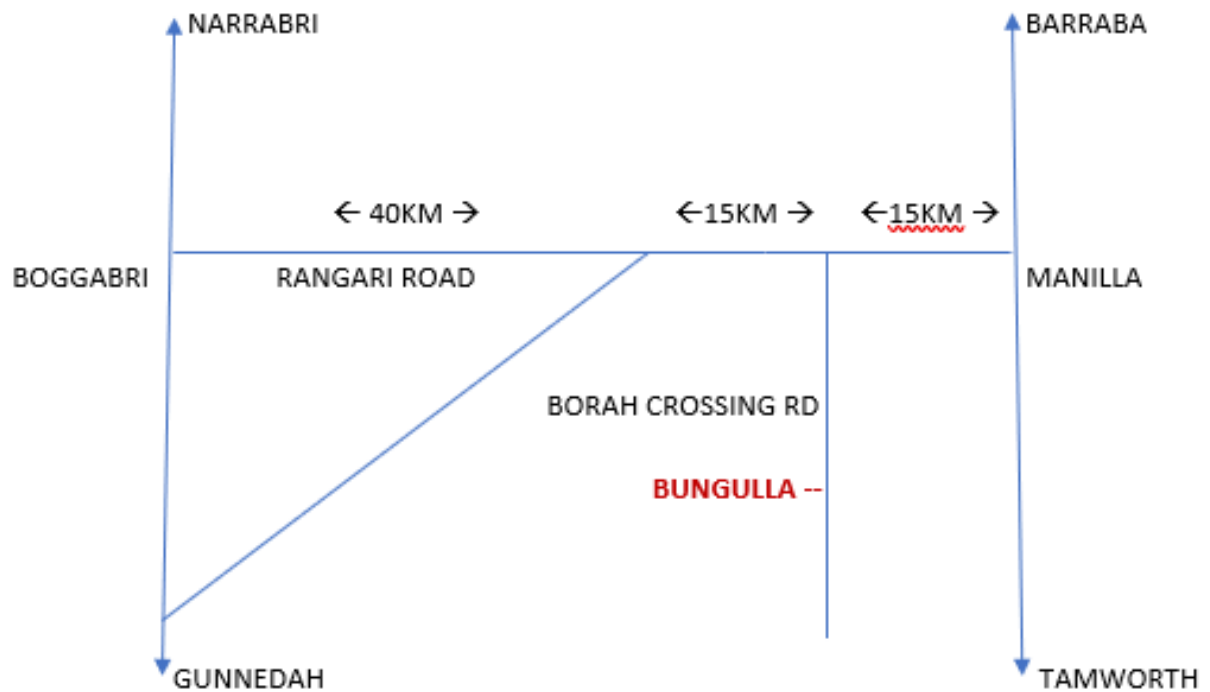

We are very lucky that our boys share the same passion for shorthorn cattle and all 3 have their own studs run in conjunction with Nagol Park. Logan - Howzat, Joshua - JJ & Hayden - BMS. This follows the tradition started by Niaomi's parents Keith & Vicki Ridley who gave Niaomi her first breeding animal. The boys will offer 3 bulls in the sale. We would like to thank Logan, Joshua & Hayden for all their assistance in preparing the bulls for the sale.

We look forward to catching up with you on the 27th July 2022. If we can be of any assistance prior to the sale please do not hesitate to contact us.

Kind Regards Roger, Niaomi, Logan, Joshua & Hayden Evans

DIRECTIONS TO BUNGULLA

128 Borah Crossing Rd, Manilla

From Manilla, take the Rangari Rd for 15km, turn left into Borah Crossing Rd, Bungulla is on the Right.

From Boggabri, take the Rangari Rd for 45km, turn right into Borah Crossing Rd, Bungulla is on the Right.

From Gunnedah, take the road to Barraba, turn right onto Rangari Rd, travel for 15km turn right into Borah Crossing Rd, Bungulla is on the Right.

UNDERSTANDING EPD's

MATERNAL EPDS

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering.

Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk.

Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPD'S

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE.

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either.

However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values.

Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well-conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING RANKINGS

EPD ranking values are a critical function, however to use EPD's correctly, it is important to first understand how the EPD values ranks relative to the breed average. To make this process easier, the Rank % value is published with each EPD and \$Index and tells you where each value ranks relative to breed average. With the exception of EPD and \$Index values that may exceed your thresholds for that trait, breeders should concentrate on the Rank % itself as the critical value. Eg: ranking of 2 = top 2%,

Bungulla Bulls used in cross-breeding operations in the North

Mt Enniskillen (Blackall QLD) have been using Bungulla Shorthorn Bulls (Manilla, NSW) for the past couple of years.

They have been put over Santa Gertrudis cows who are continuing to produce excellent quality Santa Shorthorn x Calves.

We are currently experiencing a terrific season and seeing good growth in their progeny. The bulls have never seen a setback and continue to go ahead.

Andrew Thomas - Mt Enniskillen Manager
